

ENVIRONMENT & ENERGY POLICY

Cimtas Pipe aims to proactively implement and develop a lean and sustainable Environment and Energy Management System in its production processes and services.

To this end, Cimtas Pipe regards “Environment and Energy” as the protection of all employees, facilities, machinery, tools, equipment and offices used, information produced, environment and other individuals in the near vicinity and the trust and reputation we have built over long periods, shielding our customers and third parties from all kinds of pollution, hazards, accidents and using natural resources and energy effectively.

This approach also assures the sustainability of our business.

In order to achieve this target;

- International ISO 14001 and ISO 50001 management system standards will be taken as a reference and implemented.
- All relevant legal regulations and other requirements will be observed.
- All employees will duly observe and contribute unconditionally to all targets, authorities, responsibilities, concepts, procedures, instructions and fundamentals determined by the management.
- Mindful of the fact that we are interacting with the environment and society, we will ensure that energy and natural resources will be used proactively, the environmental impact of our activities will be assessed, periodic reviews will be carried out, deviation will be kept under control and minimized through constant improvement and the necessary resources will be created to increase our environmental and energy performance.
- When procuring machinery and equipment to be used in processes and investments or during their revisions, environment-friendly, energy-efficient technologies and applications will be used within the scope of change management.
- In Environment and Energy matters, we will strive to improve the awareness of our employees, suppliers and society.

Cimtas Pipe Management will ensure that the declared Lean Environment and Energy Policy is understandable at every level in the Company, applicable to all operations, the constant improvement and sustainability are achieved with help of lesson learnts.
